

Milliken ResQ™ Military FR Fabrics

Protection You Deserve

Combining textile science with chemistry, Milliken's team of researchers created a breakthrough in flame resistant protection. Testing indicates ResQ self-extinguishes almost instantly when removed from flame, and can reduce predicted percent body burn compared to other FR fabrics, reducing recovery time and potentially saving lives.

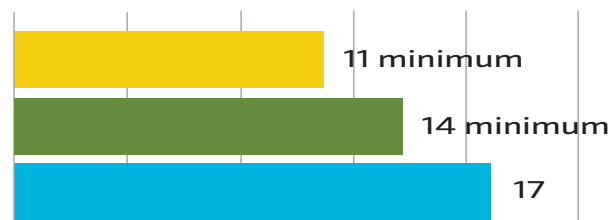

Performance You Demand

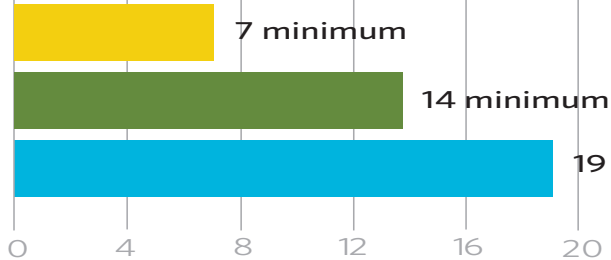

Regardless of where you fight, ResQ is built to hold up to the rigors of your environment. The unique combination of fiber and fabric construction makes ResQ strong and tough, even when wet. So no matter how much you sweat, ResQ can take it.

Concealment You Need

ResQ fabrics maintain color longer, and when colors don't fade, you stay visually hidden during the day, and NIR retains its protection at night.

ResQ fabrics are 100% Made in USA, not just Berry Compliant. This means no import waivers are required. In short, ResQ is a durable, high-performance product, made in America.
