

Milliken®
MRG Cords
Specialty Cords

If You Envision It, We can Build It

Milliken integrates multiple twisting technologies, solvent and aqueous treating lines, an international R&D organization, and our new single-end prototype treater to offer a full suite of capabilities for developing and manufacturing specialty cords.

Milliken's Specialty Cords

Aramid Cord

For two-wheeler as well as racing and other specialty tire applications.

Hybrid Cord

PA/Aramid hybrids for cap ply.

Nylon Cord

940/2, 1400/1/2, 1400/1.

Conductive Cord

Treated for electrostatic discharge.

Custom-Engineered Cords for Diverse Applications

- Consistently excellent quality for downstream processability and property retention
- Metered packages
- Twist evenness
- Integrated development & manufacturing capability
- A complementary product offering of tire and MRG reinforcements and processing aids

Milliken™
